

Z-BAND

ZHC-Insight

The industry's first remote diagnostic software for Z-Band® RF video distribution systems.

Lighten your workload and eliminate unnecessary site visits with ZHC-Insight, the latest technology solution from the experts at Z-Band.

Monitor and manage a Z-Distribution ZHC system remotely and securely from any web-enabled device, anywhere.

FEATURES

Remote Diagnostics - View status of each ZHC device, compatible Z-Band baluns, or the entire Z-Band ecosystem

Notifications - Set alerts for system changes

On-Demand & Scheduled Data Pulls - See and/or schedule diagnostic data including changes in the incoming and outgoing RF signals on a ZHC unit

Adjust Settings Remotely - Change device input, signal slope, amplitude, and control tone

Role-Based User Permissions - Assign permissions to specific users or create user groups with pre-defined set of roles

OVERVIEW

- Remote diagnostic software platform for Z-Distribution ZHC systems
- Control user devices connected to Z-Band baluns with either RS232 or IR
- Access platform via any web-enabled device
- Elegantly presents data in an intuitive UI
- Runs on Windows Server 2022
- Closed system secured by SSL encryption

MONITOR

- Number of baluns connected
- RF input and output levels on ZHC unit
- Internal slope and attenuation levels
- Approximate balun distance from ZHC unit
