

# ZHC-Insight

The industry's first remote diagnostic software for RF video distribution systems

**Lighten your workload and eliminate unnecessary site visits with ZHC-Insight, the latest technology solution from the experts at Z-Band.**

Manage and monitor **Z-Distribution ZHC systems** remotely and securely from any web-enabled device, anywhere.

## Features

**Remote Diagnostics** – View status of each ZHC device, hub or entire system from a desktop, laptop, tablet or phone.

**Notifications** – Set alerts for system changes

**On-Demand & Scheduled Data Pulls** – See the data you want when you want it

**Adjustable Attenuation** - Eliminate on-site manual adjustment

**Role-Based User Permissions** - Grant access at 3 levels: Super Admin (All Access), Admin (Limited Access) Technician (Read-only Access)

**On/Off Pilot Tone** - Eliminate interference on adjacent channels

**Secure SSL Encryption** – Closed system does not integrate with patient or proprietary info

## Overview

- Remote diagnostic software platform (optional) for Z-Distribution ZHC systems
- Access platform via any web-enabled device
- Server aggregates data into UI
- Runs on Windows 16
- Closed system secured by SSL encryption

## Monitor

- Incoming video connection type
- Number of baluns connected
- Balun run distance
- RF level on hub inputs & outputs
- Internal attenuation

## About Z-Band

Z-Band was one of the earliest technologies to achieve convergence: voice, data and video traveling across one cable, on one infrastructure. Today, our expert staff continues to develop and support a full spectrum of RF (ZTV) and IP (Z-IP) products to solve your video distribution system challenges quickly and easily.

Troubleshoot quickly and accurately.

**Make your work life a little easier with ZHC-Insight.**
