

COMPANY OVERVIEW

A trusted leader in video distribution systems, **Z-Band Technologies** provides tailored solutions for the unique needs of the healthcare industry. With over two decades of experience and a nationwide footprint in hospital deployments, **Z-Band** is committed to helping enhance the patient and staff experience through reliable, scalable, and user-friendly technology.

CORE SOLUTIONS

Z-Band enables hospitals to deliver engaging in-room entertainment and internal content that helps both patient satisfaction and recovery. Integrating with interactive care systems, patients have access to health information, meal ordering, and other personalized services, all from the comfort of their room.

Our solutions provide centralized control of video, digital signage, and messaging across the facility, simplifying IT management. And with the ability to proactively monitor and conduct remote diagnostics, hospitals can reduce downtime and the need for on-site service, allowing staff to focus less on troubleshooting technology and more on patient care.

Patient entertainment, way-finding and signage, nurse call systems, and emergency alerts. All of this on a platform that provides hospitals with a unified infrastructure. Communicate clearly and consistently with patients, family members, visitors and staff for a more connected and responsive care environment.

WHY Z-BAND?

- Trusted by over 500 hospitals
- Tailored solutions for your specific needs
- Scalable applications to maximize your budget
- Enhanced patient experience
- Improved operational efficiency
- Integrated communication infrastructure
